

Email to Congressperson (150 words):

Dear _____

I am writing to ask you to co-sponsor the Home Modification for Accessibility Act (H.R. 7676) introduced by Representatives Charlie Crist (D-FL) and Thomas Suozzi (D-NY). This important legislation will enable Americans to live in their own homes as they age. And where we increasingly receive health care. But our houses are not properly prepared for older or disabled people and their caregivers.

The Home Modification for Accessibility Act (H.R. 7676) will help solve this problem by offering financial incentives that encourage people to plan ahead, upgrade their homes and make them safe as they get older. It will help reduce injuries and subsequent high medical costs associated with falls, as well as drive development and investment in the market, creating new job opportunities for skilled providers and contractors.
